The eduroam network is Florida Tech's wifi network for current Florida Tech students, faculty, and staff. Only devices that support the "WPA 2 Enterprise" security protocol will be able to connect, and make use of it. Most modern phones and computers will support this. Please follow the instructions HERE in order to connect.

If you have a device, that does not support WPA2 Enterprise, like IoT devices, TVs or game consoles, please follow the instructions HERE to connect to the FLTech-Dorms WiFi.

If you have a wired device on the residential network, you will first need to register it here from within the FIT network. You will need your device's MAC address. You can search the web for "How to get <device name> mac address", and find specific instructions for your personal device.
Networking

Connecting to FLTech-Dorms:

1. You will first need to register your device's MAC address. To do so, follow this link, and fill out the required information. It is the same process outlined for wired devices above.
2. After you have successfully completed the registration process, on the device you want to connect select the WiFi network called "FLTech-Dorms". When prompted for a password, enter "FLTechPanthers".

Connecting to Eduroam:

Windows

1. Open the network icon in the lower-right corner of your screen. Find the eduroam SSID and choose it.

#### Ask to Join Networks

Known networks will be joined automatically. If no known networks are available, you will be notified of available networks.

#### Auto-Join Hotspot

Allow this device to automatically discover nearby personal hotspots when no Wi-Fi network is available.
2. Enter your TRACKS username followed by @fit.edu. Example: blairb2014@fit.edu. Then enter your passphrase and choose Join.

3. You may be prompted to accept a certificate. The information listed will be:

   - **Name:** pf.fit.edu
   - **Issued by:** DigiCert SHA2 High Assurance Server CA
   - **Expires:** 2/4/2021
