Networking

Connect To WIFI Through Eduroam

The eduroam network is Florida Tech's wifi network for current Florida Tech students, faculty, and staff. Below are instructions to help you connect your device. If you have a wired device on the residential network, you will first need to register it here. You will need your device's MAC address.

Windows

1. Open the network icon in the lower-right corner of your screen. Find the eduroam SSID and choose it.

Ask to Join Networks

Known networks will be joined automatically. If no known networks are available, you will be notified of available networks.

Auto-Join Hotspot

Allow this device to automatically discover nearby personal hotspots when no Wi-Fi network is available.
2. Enter your TRACKS username followed by @fit.edu. Example: blairb2014@fit.edu. Then enter your passphrase and choose Join.

3. You may be prompted to accept a certificate. The information listed will be:
   - **Name:** pf.fit.edu
   - **Issued by:** DigiCert SHA2 High Assurance Server CA
   - **Expires:** 2/4/2021

**Other/Incompatible devices**

To work on eduroam, devices must support WPA-Enterprise (not just WPA-Personal) encryption. Below is list of all the incompatible wireless devices on eduroam.

Some of the below devices work through a wired connection on the network.

- **Wired only**
- BluRay players
- **Usable on FLTech-Dorms**
- Amazon Echo, Google Home, and Apple HomePod
Networking

Smart TVs
Apple TV
Playstation 4
Xbox One
Nintendo Switch (with USB LAN adapter)
Roku Player (with Ethernet port)

Chromecast
Amazon Fire Stick, Amazon Fire TV Cube
Roku Streaming Stick
Printers (use USB or Bluetooth)
