

Accounts

What should I do if I believe my account has been hacked?

If you believe that someone has gained unauthorized access to your account (i.e.: email, PAWS, Canvas, etc.), you should report this immediately to the Technology Support Center by going to <https://support.fit.edu/tsc/> or by email at techsupport@fit.edu.

Next you should reset your TRACKS password and update your security questions to ensure that no one is able to get into your account again. Please follow the instructions [Here](#) to reset your account.
