## Can I use the Google Apps desktop features?

This allows users to install Microsoft Windows desktop access points to Google Docs, Calendar, and Gmail that are pre-configured to work with accounts on your domain. These apps launch in a streamlined Google Chrome browser window. Also, Students and Alumni can set Gmail as their default email program. Faculty and Staff cannot use the Gmail client.

Students and Alumni: [Click here to download desktop features](#)

Faculty and Staff: [Click here to download desktop features](#)
