How to create a personal database?

The TRACKS account enables students to create personal database. The database can be created on the web at <https://apps.fit.edu/mysqlrequest/>.

These databases should be for academic or research use. Commercial use is prohibited. This section outlines the steps you will need to take to create your database and maintain it.

1: Create the database

- Visit <https://apps.fit.edu/mysqlrequest/> and login using your TRACKS account.
- Click on the button which says create a database.
- Select a new password for your database.

2: Access database via the web.

- Access your database through <https://webserver1.fit.edu/phpMyAdmin>.
- Login using your TRACKS username and password you selected for your database.

3: How to reset the password?

- Visit <https://apps.fit.edu/mysqlrequest/> and login using your TRACKS account.
- Type in a new password which satisfies the requirements stated on the page.
- Click "Submit" to set the password.

Unique solution ID: #1221
