How to manage Multiple Monitors (Windows)

Many workstations are delivered and set up with two monitors, or a laptop and a monitor. You can manage how content is displayed on these monitors by change the settings.

Â

To start right click on you desktop background in an area that is free of icons and you will get this menu:

Â

Choose screen resolution. It will bring up the following menu.

General

Change the appearance of your displays

Display: 1. DELL P2210

Resolution: 1680 × 1050 (recommended)

Orientation: Landscape

Multiple displays: **Extend these displays**

- Duplicate these displays
- Extend these displays
- Show desktop only on 1
- Show desktop only on 2

This is currently you [Advanced settings](#)

[Make text and other](#)

[What display settings should I choose?](#)

OK Cancel Apply

Here you have many options, if you click on Identify in the top right hand corner, it will flash large numbers on your monitors telling you which is 1 and which is 2. To use both displays as one really large screen click Extend these Displays. To see the same exact thing on both screens
